

# COMPOSITE MAGNETIC POWDER

- High sensitivity
- Composite magnetic particle eliminates the need for additional rust inhibitors, defoamers, and dispersants
- Clear, visible defect indication under UV light
- Excellent powder flowability
- Good dispersion stability
- Excellent surface wettability

Part No.	Description	Package/cans
MPI-CP30	<div>1. Suitable for surface and near-surface inspection of magnetizable parts</div> <div>2. Usage: Simply mix and dilute the magnetic powder to the recommended concentration (.025-.058lb/gal) to form a high performance magnetic Suspension</div>	2.20lb
